***Election/Restrictions***

It is noted that claim 39 has been added in the Amendment filed 2/22/2007.

Claim 39 is drawn to a probe for detection of the molecule according to claim 1, wherein the probe is selected from the group consisting of SEQ ID NOs: 16 to 28, which encompasses thirteen sequences. Claim 8 (now cancelled) was drawn to probes for the detection of a nucleic acid material and was included in the originally elected restriction Group 11 (mailed 9/22/2005). However, claim 8 did not recite specific SEQ ID NOs. Claim 11 was drawn to probes or primers selected from the group consisting of SEQ ID NOs: 16 to 28, and was divided into Groups based on individual sequences. Since new claim 39 now recites specific SEQ ID NOs for probes for detection of the molecule of claim 1, a species election will be required. According to the policy for the examination of patent applications that claim large numbers of nucleotide sequences (see MPEP 2434), up to ten independent and distinct nucleotide sequences will be examined in a single application wherein "up to 10" can mean only one nucleotide sequence.

The inventions are distinct, each from the other because of the following reasons:

Claim 39 is generic to the following disclosed patentably distinct species:

SEQ ID NO:16, SEQ ID NO:17, SEQ ID NO:18, SEQ ID NO:19, SEQ ID NO:20,  
SEQ ID NO:21, SEQ ID NO:22, SEQ ID NO:23, SEQ ID NO:24, SEQ ID NO:25, SEQ ID  
NO:26, SEQ ID NO:27, SEQ ID NO:28.

The species are independent or distinct because each of the sequences are uniquely different nucleotide compositions which are not obvious over each other and

are structurally, functionally and biochemically distinct from one another. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura McGillem whose telephone number is (571) 272-8783. The examiner can normally be reached on M-F 8:00-5:00.
